

ASSEMBLY NOTES:

-  Use Parker O-Ring Lubricant or equivalent petroleum based lubricant
-  Use Low-Temp Lubriplate

NOTICE:

NFPA safety standards require that monitors mounted on aerial apparatus be equipped with an elevation safety stop so that the monitor cannot be operated at more than 45° above horizontal.

The requirement is met on this deck pipe by means of a stud #13, which is mounted in the face of the outlet pipe, below and to the left of the handle.

If this deck pipe is not to be used on an aerial, a greater vertical operating range can be achieved by removing the stud and replacing it with the extra plug, #12, supplied.
