## Product Update

Date: 6/1/16

**PRODUCT NAME:** Rapid Fill™

**AKRON PART NUMBERS:** ARFS-500500

### **PRODUCT DESCRIPTION**

---

The Rapid Fill system is now available in 24 volts and is compatible with both Class A and B foam. The Rapid Fill is a safe, cost effective alternative to fill your foam tank without climbing to the top of the truck. Kit Includes:

- 3.3 gpm (12.5 lpm) self-priming electric pump with integrated check valve
- Harness assembly with activation switch
- Foam concentrate pickup tube
- Pump panel adapter fitting
- Foam concentrate “full level” cutoff switch
- 7.50' (229 cm) of braided hose
- Connection fittings

The installation is so simple that most Rapid Fill systems can be installed at the fire station. Once installed, simply attach the pickup tube to the connector on the side of the truck, insert the tube into the foam bucket, flip the switch to the “on” position, and fill the tank from a safe ground level.

### **FEATURES**

---

- Increase firefighter safety with efficient foam transfer to the tank from ground level
- Easy installation into new or existing apparatus
- Simple to use
- Cost effective solution
