

February 23, 2018

Dear Valued Customer,

EZ-Fill Update

New for 2018, Hale is enhancing the EZ-Fill controller to a color backlit LED version. The size is approximately 0.3” smaller in length and width and will be mounted by two 10-32 studs and operates over CAN J1939. The new controller is more customizable as the colored ring and label are tailored to the application. The backlit rings will turn red or green to correspond to the foam tank selected to act as a visual aid when refilling your foam. In “A” foam operation the buttons are illuminated red, while in “B” they are illuminated green and blue while in “flush” mode. The “B” label pictured below is shipped loose and a blank in its place giving you the flexibility of having “A” only, “B” only, or both labeled. This product will be released in April with any new orders for May delivery.

Installation

Any units in the field needing a replacement controller will be retrofitted with this new controller. The retrofit installation kit (546-00074-000) will include an updated harness (513-00141), two nuts for mounting, and H-Bridge (610-00063) when ordering.

Thank you for your continued support of Hale Products, Inc. If you have any further questions or concerns, please feel free to contact our customer service center at 1-800-533-3569 or haletechnicalsupport@idexcorp.com.

Sincerely,

Jeremy Foxx
