5/19/16

**PRODUCT NAME: Revolution™ Intake Valve**  
**Now with optional drain valve**  
**AKRON PART NUMBERS: 7982 and 7983**

## PRODUCT DESCRIPTION

The Revolution is now available with an optional drain valve on the bottom of the unit. In some situations it is desirable to drain the remaining water from the bottom of the Revolution. This allows the user to easily drain the Revolution so there isn't any excess water.

The Revolution Intake Valve is our toughest valve yet, capable of flowing 2000gpm. Mounted on the exterior of your apparatus, this valve features an easy to operate handwheel, improving operations and a position indicator that clearly marks when the valve is open or closed. Available with an optional swivel elbow, the Revolution is perfect for any pump layout.

## LIST PRICE
