

PORTABLE SPRAYER

Combat the spread
of viruses and
other contaminants,
like COVID-19*

The Water Flow Experts

NOW AVAILABLE!

Portable Sprayer for Decontamination Agents*

Compatible with disinfectant agents used to combat COVID-19*

When it became apparent that COVID-19 would affect us all, Akron Brass sought to identify a way that would help our first responders cope with coronavirus-related issues.

Guided by the principle of giving back to the customers that have supported us for more than 100 years, we created a very affordable **Portable Electric Sprayer** that fire departments can easily use to disinfect surfaces in and around their apparatus, buildings, and other areas.

Your customers will be interested in this Portable Sprayer--we've recently sold the sprayers to fire departments, truck dealers, colleges, school bus garages, and industrial manufacturers.

The FS100 Portable Sprayer price is set to be affordable to end users, so we are offering it with bare minimum margins. Consequently, there are no additional discounts available for this product; however, Portable Sprayer purchases will contribute towards your Online Selling Product Credit of 5% of aggregate online net sales when your business is selected as the lead source at checkout. Please refer to the ["Online Selling" section](#) of your 2020 Distribution Discount Plan and Election Form for more details.

Important to know:

- Ships within three (3) business days
- For purchase only in the US
- Direct online credit card purchases only
