NEW Handheld Wireless Remote Control

For Municipal Electric Monitors

Advanced features and functionality allow the first responder to safely operate electric monitors and valves from multiple positions around the truck using the all-new wireless remote by Akron. For the first time, operate up to two monitors and valves, maneuvering all operational positions plus stow, deploy, oscillation, valve discharge and more.

The new multi-function handheld controller offers greater control, flexibility and visibility on the fireground.

Akron will begin its public market launch to end users on the first of December. To learn more about the new [Style 6047 Wireless Remote Control](#), refer to the quick links section for resource material.
